### Summary

---

Quadrilingual Junior Full Stack Developer and Cybersecurity Analyst with a professional background in threat analysis and system integrity. Leveraging intensive training from Ironhack (mastering the MERN stack and AI-assisted workflows) to build production-ready, secure, and user-friendly web applications. Highly proficient in English, Russian, Ukrainian, and Turkish, looking to contribute my secure coding mindset and technical skills to a fast-paced development team.

### Professional Experience

---

#### Cybersecurity Analyst Intern, *CyberTech*

03/2022 – 01/2023

Remote

- \* "Conducted vulnerability assessments and penetration testing to identify and document critical system risks."
- \* "Integrated secure coding principles (OWASP) into development workflows to mitigate common vulnerabilities like SQLi and XSS."
- \* "Monitored network traffic for potential threats and assisted in comprehensive threat intelligence reporting."
- \* "Collaborated with development teams to ensure technical solutions adhered to high-level security standards."

### Projects

---

#### CardioWeb, *Health-Tech Analytics & Data Visualization App*

02/2026 – 05/2026

- \* "Developed a health-focused web application utilizing the MERN stack to track and visualize cardiovascular metrics with high precision."
- \* "Implemented dynamic data visualization using modern libraries to provide users with clear, actionable insights into their health data."
- \* "Designed a clean, professional UI centered on accessibility and ease of use, ensuring a seamless experience for health-conscious users."
- \* "Integrated secure data handling practices to protect sensitive user information, consistent with Cybersecurity best practices."
- \* "Deployed the application on Vercel, leveraging CI/CD pipelines for efficient updates and optimal performance."

#### VibeCheck 🗺️, *Full Stack Web Application | MERN Stack & AI Integration*

01/2026 – 04/2026

- \* "Developed a concert organizing and social group management platform using the MERN stack (MongoDB, Express, React, Node.js)."
- \* "Implemented a secure and responsive dashboard with real-time search and category-based filtering for event discovery."
- \* "Integrated AI-assisted development workflows to optimize UI components and backend routing logic."
- \* "Successfully deployed the application on Vercel, ensuring high availability and seamless user experience."
- \* "Applied Cybersecurity principles to protect user data and ensure secure API communication between the client and server."

**Endless Ball, Physics-Based Arcade Game**

02/2026 – Present

- \* "Developed a high-performance 2D arcade game using Object-Oriented Programming (OOP) in JavaScript, focusing on physics-based mechanics and collision detection."
- \* "Implemented complex game logic using JavaScript Classes, managing dynamic object interactions and real-time score tracking."
- \* "Designed a responsive game engine that ensures smooth performance across different screen resolutions and browser environments."
- \* "Optimized rendering cycles to maintain a consistent frame rate, showcasing strong problem-solving skills in algorithmic efficiency."

**Education**

---

**Cerfication, Ironhack** 

01/2026 – 03/2026

Remote

- \* "Completed 400+ hours of intensive full-stack development training, mastering the MERN stack (MongoDB, Express, React, Node.js)."
- \* "Specialized in AI-assisted development workflows, utilizing modern tools to optimize code efficiency and speed up the deployment process."
- \* "Developed and deployed multiple full-stack applications, emphasizing secure coding practices and modular architecture."
- \* "Practiced Agile and Scrum methodologies to manage project timelines and collaborate on technical solutions."

**Skills**

---

**Frontend**

JavaScript (ES6+), React.js, Vite, HTML5, CSS3,  
Responsive Design (Flexbox/Grid).

**Security**

Vulnerability Assessment, System Integrity, Secure  
Coding Practices, Threat Analysis.

**Backend**

Node.js, Express.js, RESTful APIs, MongoDB.

**Tools & DevOps**

Git, GitHub, Vercel, Render, Agile/Scrum, AI Prompt  
Engineering.

**Languages**

---

**Turkish**

(Native)

**English**

Full Professional

**Russian**

Full Professional

**Ukrainian**
